Education

Zeal College of Engineering, Pune, India **2022 - 2026**
- Bachelor of Technology in Artificial Intelligence and Data Science | CGPA : 9.18 (expected)

St Paul Junior & Senior College, Nagpur, India **2021 - 2022**
- *Class XII (State Board), Percentage : 86.33%*

Agragami High School, Wardha, India **2019 - 2020**
- *Class X (State Board), Percentage : 88.00%*

Skills

- **Programming Languages:** Java, Dart, Python, C++, HTML, CSS.
- **Frameworks:** Flutter, JavaFX.
- **Database Management:** MySQL, MongoDB, Firebase.
- **Version Control & Collaboration:** Git, GitLab, GitHub.

Projects

Smart Samadhan | JavaFX, Firebase & Gemini API
- Designed a desktop-based grievance system where citizens can report and track civic issues such as potholes, sanitation, and electricity failures.
- Integrated Firebase Firestore & Storage to manage 100+ monthly complaints with real-time updates and secure media uploads.
- Incorporated Gemini API to auto-generate complaint descriptions and multilingual translations, improving accessibility by 40%.
- Built admin dashboards with charts/tables for pending vs. resolved cases, reducing verification time by 30%.

AI Resume Analyzer App | Streamlit, Python & MySQL
- Developed an AI-powered tool to analyze PDF resumes and extract education, skills, and work experience with 85% accuracy.
- Implemented a resume scoring system to benchmark candidates against job requirements, cutting recruiter effort by 50%.
- Added recommendation logic to suggest missing skills, courses, and career tracks, enhancing employability insights.
- Released a Streamlit-based dashboard with a MySQL backend, enabling instant resume evaluations in <1s.

Privacy Handler for LLMs (Ongoing Project) | Python, NLP, Flutter & Render
- Developing an AI-powered privacy handler that anonymizes Personally Identifiable Information (PII) during interactions with large language models (LLMs).
- Leveraging spaCy/Transformers + Faker for semantic-preserving anonymization, reducing false positives by 15%.
- Building a Flutter-based mobile interface to allow users secure and intuitive interactions with LLM responses.
- Constructing backend on Render to deliver low-latency (<200ms) responses for scalable, real-time privacy protection.

Academic and Extracurricular Achievements

Technical Head | IBM Technical Team **2024**
- Organized technology-focused workshops and coding competitions, fostering peer learning and innovation.
- Conducted interactive sessions on emerging tools and frameworks under IBM initiatives, enhancing student exposure to industry practices.

Coordinator | Earn and Learn Scheme (SPPU) **2023 - Present**
- Oversaw academic support activities, task distribution, and team collaboration as part of the university's student assistantship program.
- Ensured smooth execution of assigned duties, balancing academic commitments with program responsibilities.

Experience

Intern | Incubators Systems Pvt. Ltd., Pune **July – October**
- Collaborated with the development team to design and implement cross-platform mobile applications using Flutter, enhancing functionality on iOS and Android.
- Built interactive UI components and integrated APIs, improving app responsiveness and user experience.
- Contributed to testing and debugging workflows, reducing app errors and improving release stability by 20%.
- Gained hands-on experience in cross-platform mobile development, agile collaboration, and project lifecycle management.

ACHIEVEMENTS / HOBBIES

- Secured **3rd Prize** in **SuperX Competition**, where more than **220+ projects** participated. This recognition highlights the innovation, teamwork, and technical skills demonstrated through our project.
- Earned a 2★ rating on CodeChef by consistently competing in weekly contests among 10,000+ global participants, demonstrating competitive programming expertise.
- Hackathon Contributor: Participated in Google Solution Challenge 2025 and Smart India Hackathon 2024, collaborating with 5+ team members to build scalable solutions for real-world use cases under strict deadlines.
